

2D Animated STEM Series

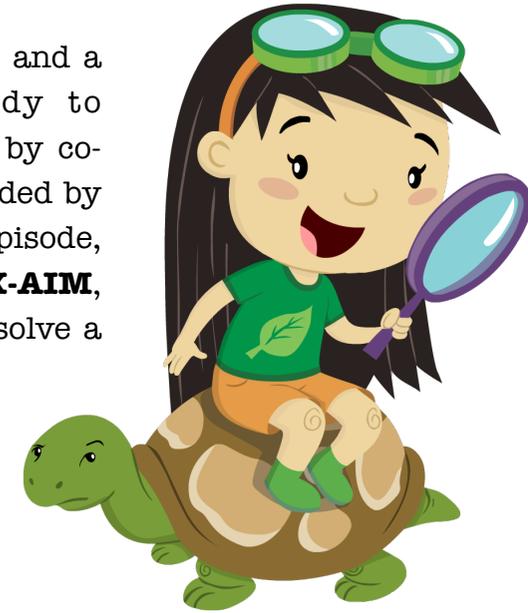

52 X 11 min

Ages 4-7

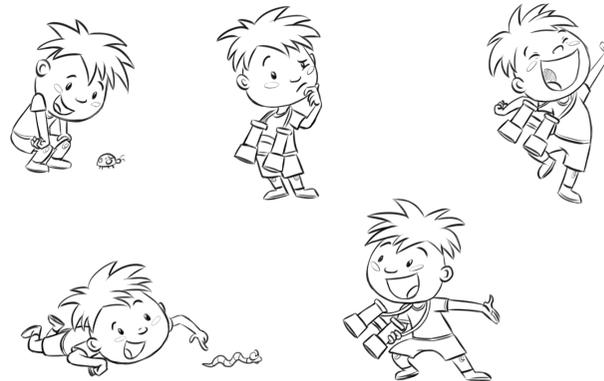

GALAPAGOS X

Made up of 4 life science explorers and a blue-footed booby bird is ready to investigate, Team Galapagos is led by co-captains **Otis**, 8 and **Cam**, 8, and aided by **Sherri**, 9, and **Hagan**, 6. In every episode, the kids get a Call to Action by **X-AIM**, their AI mainframe and set out to solve a case often in real world locations.

DISTRIBUTION

In addition to distributing the show worldwide on TV and digital platforms, Big Bad Boo will partner with Google Expedition for a virtual reality experience. With every episode, the audience can travel to the unique location, put on their VR glasses with the free Google Expedition app and then they can also look around and learn about this new location.

ABOUT

Big Bad Boo is a Vancouver-based studio with 10 years of experience, producing and distributing kids content, including 4 original animated series. 1001 Nights, 16 Hudson and The Bravest Knight air in over 120 countries worldwide.

EPISODE SAMPLE: TURTLE TROUBLE

TG gets a call to action and dispatches Cam and Otis to investigate. The famous Hawksbill Sea Turtle, an endangered turtle from the Great Barrier Reef, is not only stuck under a rock but her airways are blocked. TG finds a straw stuck in her nostril. They rescue the turtle and release her back into the ocean.

VR: we are at the bottom of the Great Barrier Reef. Wow! Look Around. We can see the turtle, and help her. We can also hunt for digital Easter eggs by pressing on various coral reef and sea animals. Maybe a fish giggles and swims away or we hear a fun fact. Did you know, the Great Barrier Reef houses the largest coral reef system in the world, including more than 3000 coral reef?
